## **DETAILED ACTION**

### ***Reasons For Allowance***

1. Claims 1,3,9,10 and 13 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claims 1 and 3 recites a device for measuring the intensity of a strong current passing through a wire wherein a resistance R and an inductance L of the turn of conductive material define an  $L/R$  filtering constant of the turn of conductive material with which the turn of conductive material filters components of the current passing through the wire, in combination with other elements of the claim. Since claims 9 and 10 depend from claim 3, they are also allowed.

Claim 13 recites a device for measuring the intensity of a strong current passing through a wire wherein said is a filter that filters components of the current passing through the wire and wherein a resistance R and an inductance L of the turn define an  $L/R$  filtering constant of the filter, in combination with other elements of the claim.

These features in combination with other elements of the claims are neither disclosed nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
